

FRESH START PALLET PRODUCTS

Fresh Start Pallet Products
is a non-profit based in Hartford.

We hire individuals recovering from addiction, life challenges and recent refugees beginning their new life here in America. We teach them woodworking and carpentry skills. They build fine furniture and related wood products.

Many of our products are made from reclaimed shipping pallets and lumber.

We're looking for retail partners to help grow sales and our organization so we can expand our service to additional members of the community.

Let us know if you're willing to join our mission and partner with us.

We can work together to distribute some of our standard products or we can collaborate to develop a custom item that's suited to your customers.
